MODELL- UND FORMENBAU

Modell- und Formenbau Pape was founded in 1955 in Braunschweig by model constructor foreman Otto Pape as a company for foundry model construction.

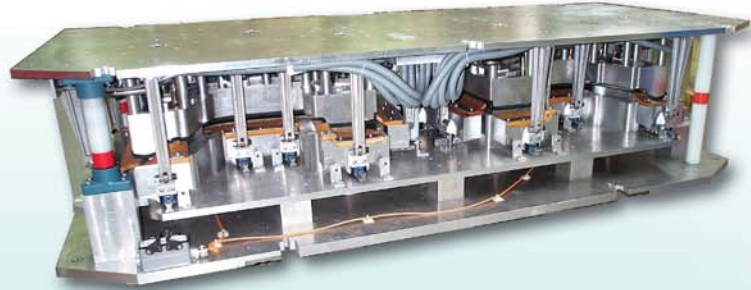

Our customers appreciate us as a reliable partner based on our experiences of the last 50 years and the thereof continuously more sophisticated working and organization structures.

We are a modern company uniting tradition and technology with innovative know-how. Continuous development and investments accompanied with flexible acting guarantee customer-oriented processing of orders.

Our core competences are:

- CAD-construction and programming
- CNC-milling up to X 4000 Y 3000 Z 1250
- Foundry model construction
- Mould and tool construction
- Fixtures and gauge construction
- Design and prototype construction
- 3-D-measuring

Demonstrating our expectations to construction and quality our working processes are certified periodically by DIN ISO 9001:2000 since 1998. This shows our commitment to products with highest fineness and precision guaranteed by a well-practiced team of about 20 committed and cautious employees accompanied by a high-value network, hard and software technology.

Precision is our business

FROM THE IDEA ...
... TO THE SERIES

CAD-Construction and programming

CNC-Portal milling machine 4 and 5 axle

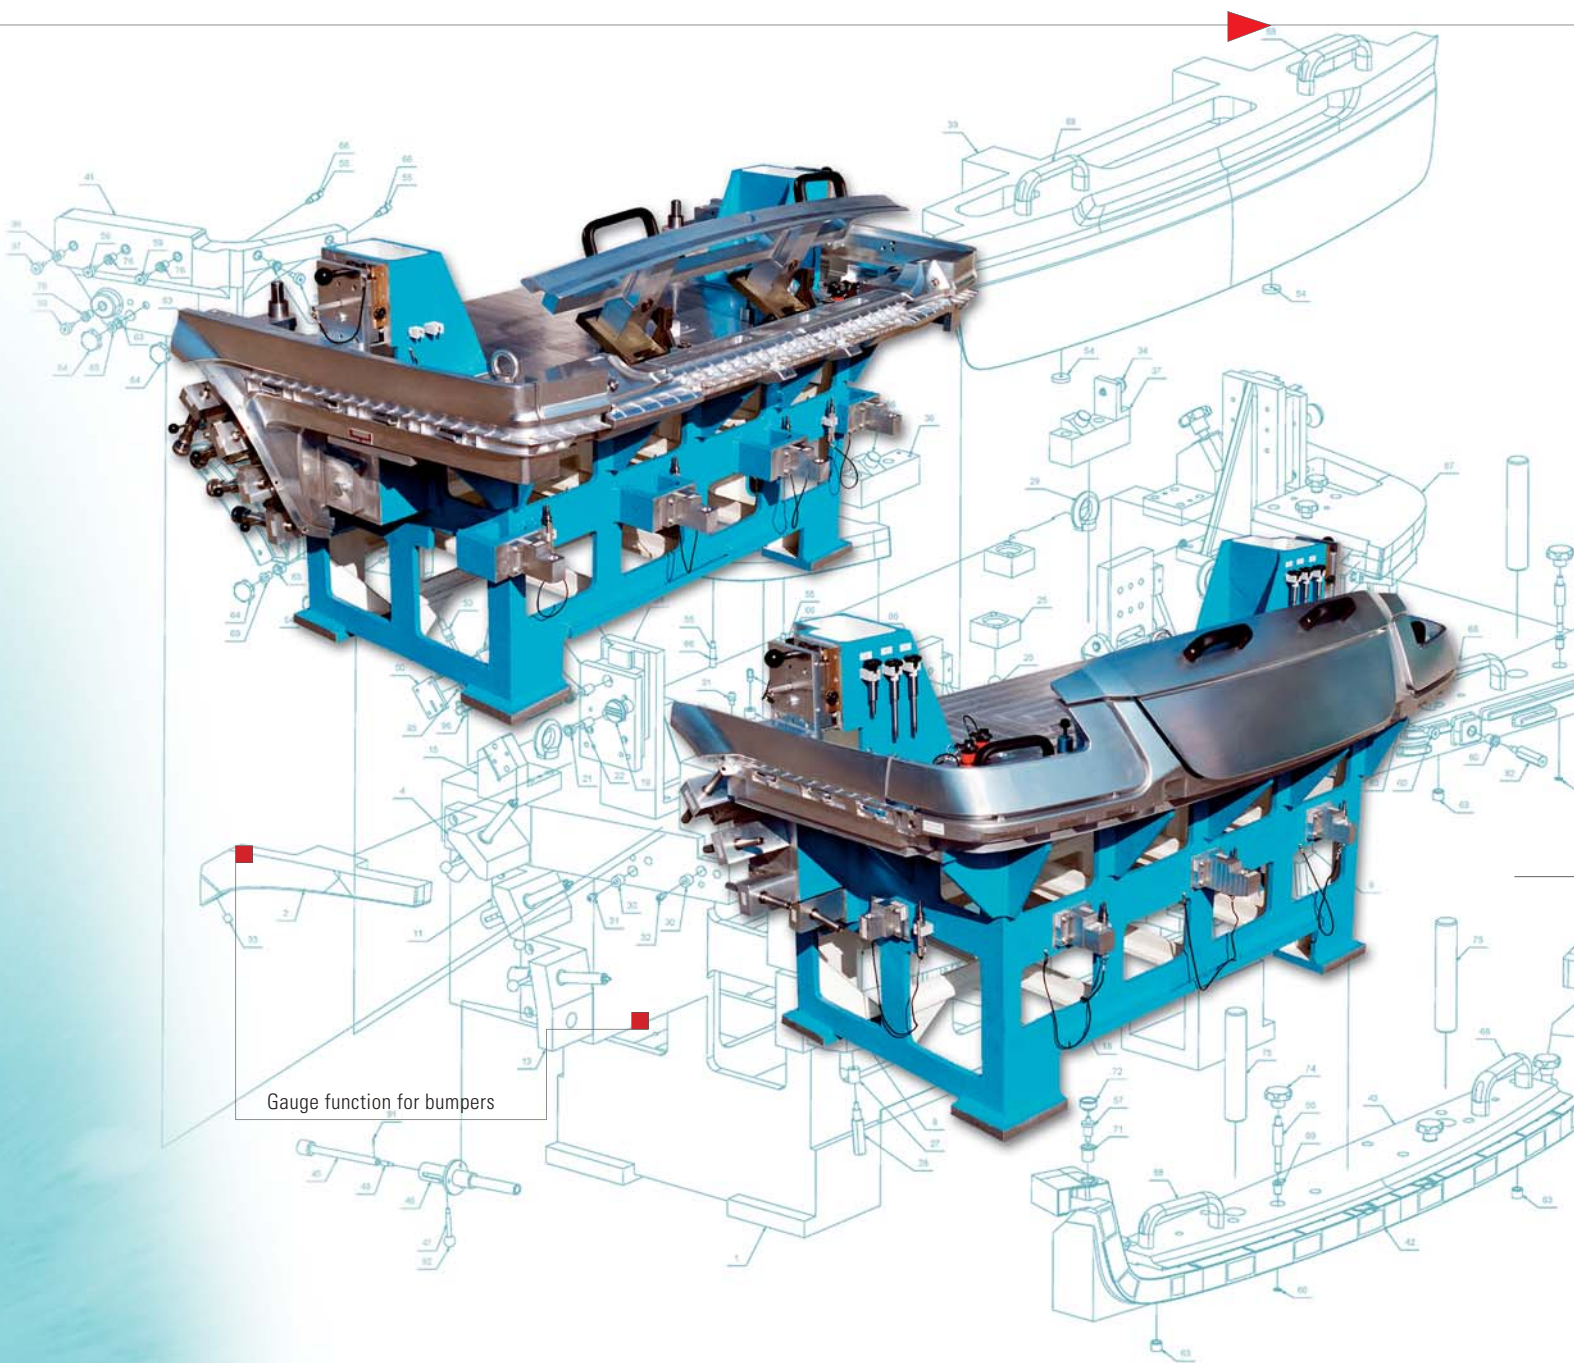

3-D-Measuring technology in the air-conditioned room

EVERYTHING
FROM ONE SOURCE.

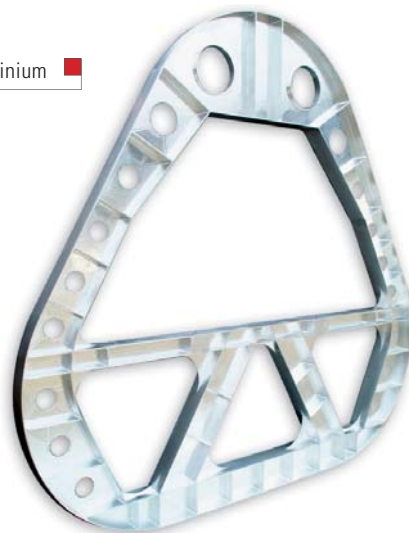

Forms and devices for any scope

Gauge function for bumpers

Milling piece made of aeronautic aluminium

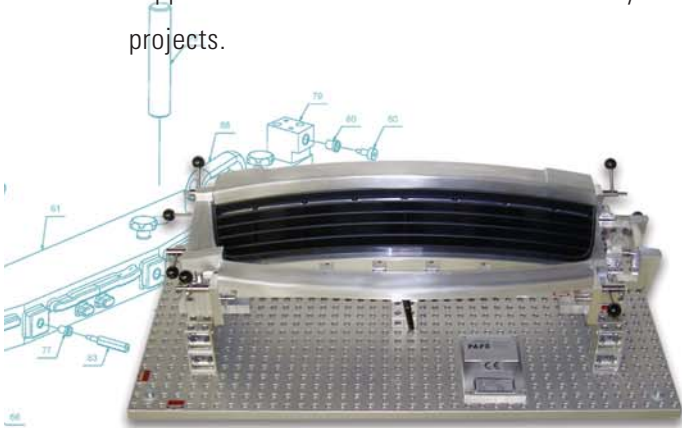

1400 mm

Fixture and gauge construction

Concerning the fixture and gauge construction you will benefit from our qualified and experienced staff – also regarding construction and competent project support. We have the technical solution for your projects.

Measuring fixture for ventilation grille

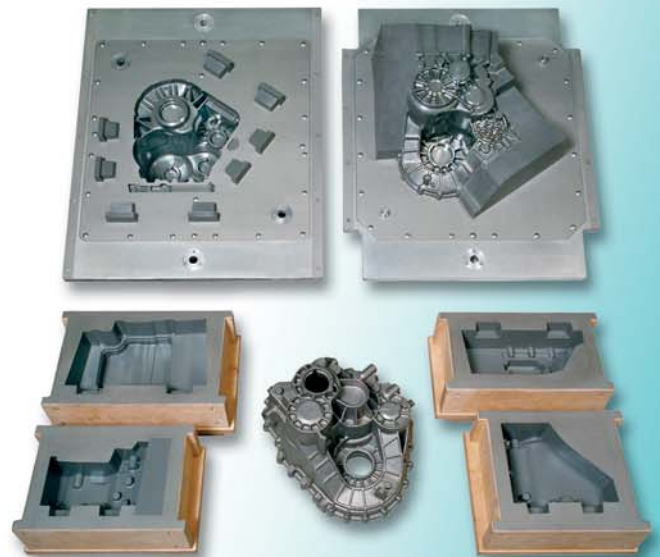

Foundry model construction

Foundry models are planned and made out of wood, plastic and metal by CAD/CAM. Thanks to our longtime experience we accomplish this also in the conventional way of construction.

By means of cutting edge technology we develop sand casting-devices and provide you with the proved castings.

Fixture construction

Foundry model construction

Precision is our business

All products leaving our house are subject to precise quality tests. Highest precision and best quality are guaranteed.

BECAUSE YOUR SUCCESS IS OUR SUCCESS.
